Press and hold to start registration procedure.

3 Installation and Set-up

Precautions

The signal quality will depend on the location and environment of the base and handset. Position your Versatis E100 Combo / Versatis E150 Combo away from sources of excessive heat (radiators, direct sunlight, etc.) and protect it from vibrations and dust. Never allow your telephone to come into contact with water or other liquids, or with aerosols. To reduce the risk of interference and optimize reception, take particular care not to install the base in the immediate vicinity of windows, large metal objects, reinforced concrete, televisions, music centres, VCR or DVD players, halogen lamps or heating devices, fluorescent lighting, burglar alarms, microwave ovens, computers, etc.
This telephone requires an electrical power supply in order to function.
To clean your Versatis E100 Combo / Versatis E150 Combo, use an antistatic cloth lightly moistened with water.
NB: Your Versatis E100 Combo / Versatis E150 Combo is a DECT™* standard appliance designed to receive and transmit telephone calls. It is designed for connection to the public telecommunications network.

Fit the rechargeable batteries in each handset

1) Install the AAA batteries (Brand name: High power, Capacity: Ni-MH 1.2V/ 400mAh, or Brand name: SANIK, Capacity: Ni-MH 1.2V/400mAh) into handset in accordance with the polarity marked in the battery compartment.
2) Close the battery compartment cover, sliding it into place and pressing firmly to make sure it is secure.

Only use rechargeable batteries with exactly the same specifications as those supplied with the product.
Using non-rechargeable or non-conforming batteries can damage the product and could pose a health hazard (see "Technical Specifications").
Failure to comply with this recommendation will invalidate the manufacturer's warranty.
Batteries can split or leak if incorrectly inserted , opened or exposed to heat. Never dispose of batteries in a fire: they could explode.

4 Telephone Base Settings

Base ringer volume

You can set the ringer volume on the telephone base from level 0 to level 5. Level 0 means the ringer is off.
To adjust the ringer volume, press ▲ or ▼ when in idle mode.

OFF: Turn alarm off (settings completed).
ON ONCE: The alarm sounds once at the set time.
ON DAILY: The alarm sounds daily at the set time.
5. Enter the desired hour and minute ,then press [▲/1 ▼/9]: select **AM** or **PM** for 12-hour time format.

Alarm tone

You can select from 3 alarm melodies.
1. Press [MENU] to enter in the menu.
2. Press [▲/1 ▼/9]: to select **CLOCK & ALARM** and then press [OK].
3. Press [▲/1 ▼/9]: to select **ALARM TONE** and then press [OK].
4. Press [▲/1 ▼/9]: Select the desired alarm tone and then press [OK].

Dialing mode

If you cannot make calls, change this setting according to your telephone line service. The default setting is "TONE".
1. Press [MENU] to enter in the menu.
2. Press [▲/1 ▼/9]: to select **ADVANCED SET** and then press [OK].
3. Press [▲/1 ▼/9]: to select **DIAL MODE** and then press [OK].
4. Press [▲/1 ▼/9]: Select the desired setting and then press [OK].

Registering a handset

The telephone system can support up to a total of 4 cordless handsets. Handsets that were included with your main base are pre-registered.
To add or re-register a handset:

Telephone Base:

1. Press and hold INT/✎ for 5 seconds.

Cordless Handset:

2. Press [MENU] to enter in the menu.
3. Press [▲/1 ▼/9]: to select **ADVANCED SET** and then press [OK].
4. Press [▲/1 ▼/9]: to select **REGISTRATION** and then press [OK].
5. Enter the **PIN** (default: **0000**) and then press [OK].
6. Handset displays "WAITING".

Cordless Handset:

7. You will hear a beep sound if the handset registration is successful. The handset screen displays "Handset X", where X is a number from 1 to 4.

NOTE: An error tone will sound if the registration is not successful.

Deregistering a handset

1. Press [MENU] to enter in the menu.
2. Press [▲/1 ▼/9]: to select **ADVANCED SET** and then press [OK].
3. Press [▲/1 ▼/9]: to select **UNREGISTER** and then press [OK].
4. Enter the **PIN** (default: **0000**) and then press [OK].
5. Press [▲/1 ▼/9]: Select the desired handset and then press [OK].

Changing the PIN

The phone has a PIN (Personal Identification Number) associated with it. The default PIN is **0000**. If you change your PIN, please make note of the new PIN. If you forget your PIN, you must reset your phone.
To change the PIN:
1. Press [MENU] to enter in the menu.
2. Press [▲/1 ▼/9]: to select **ADVANCED SET** and then press [OK].
3. Press [▲/1 ▼/9]: to select **CHANGE PIN** and then press [OK].
4. Enter the current **PIN** (default: **0000**) and then press [OK].
5. Enter the new **PIN** and then press [OK].

Reset

This feature allows you to restore all system settings, except the phonebook, to default settings. This feature can be useful, for example, if you have forgotten the PIN.
1. Press [MENU] to enter in the menu.
2. Press [▲/1 ▼/9]: to select **ADVANCED SET** and then press [OK].
3. Press [▲/1 ▼/9]: to select **RESET** and then press [OK].
4. Press [OK].

Area code

If you program your area code, the caller ID history displays the telephone numbers with the area code filtered.
To set the area code:
1. Press [MENU] to enter in the menu.
2. Press [▲/1 ▼/9]: to select **ADVANCED SET** and then press [OK].
3. Press [▲/1 ▼/9]: to select **AREA CODE** and then press [OK].
4. Press [OK].

Recall time

This setting allows you to choose between **SHORT**, **MEDIUM** or **LONG** to accommodate the setting of your telephone service provider for using customer calling service, such as call waiting.
To change the recall time:
1. Press [MENU] to enter in the menu.
2. Press [▲/1 ▼/9]: to select **ADVANCED SET** and then press [OK].
3. Press [▲/1 ▼/9]: to select **RECALL TIME** and then press [OK].
4. Press [▲/1 ▼/9]: Select the desired setting and then press [OK].

6 Telephone Operations

To make a call

Cordless handset

1. Press [✆].
2. Dial the phone number after you hear the dial tone.

Telephone base

1. Lift the corded handset, or press [✆].
2. Dial the phone number.

To predial a call

Cordless handset

1. Dial the phone number using the dial key pads. If you make an error when dialing, press [⮌] to erase the digit entered.
2. Press [✆].

Telephone base

1. Dial the phone number using the dial key pads. If you make an error when dialing, press [⮌/⌫] to erase the digit entered.
2. Lift the corded handset, or press [✆].

To answer a call

Cordless handset
When there is an incoming call, the LCD will light up.
Press [✆] to answer an incoming call.

NOTE: The screen shows the elapsed time as hours, minutes, seconds (hh–mm–ss) after you end the call.

Telephone base
When there is an incoming call, the LCD will light up.
Lift the corded handset, or press [✆] to answer an incoming call.

To end a call

Cordless handset
Press [⏻/] or place the handset in the charger to end a call.

Telephone base
Press [✆] or return the corded handset to the telephone base.

Muting a call

The mute function allows you to turn off the microphone while on a call. You can hear the other party but the other party cannot hear you.

Cordless Handset

1. Press [🔇]: to mute a call.
2. Press [🔇]: to resume conversation.

NOTE: The screen shows MUTE ON when mute feature is activated.

Telephone Base

1. Press [⮌/⌫]: to mute a call.
2. Press [⮌/⌫]: to resume conversation.

NOTE: The mute icon [🔇] is displayed on the LCD when mute feature is activated.

Call waiting or call waiting with caller ID service

To use call waiting, you must subscribe to call waiting service from your telephone service provider. This feature allows you to receive calls while you are already talking on the phone. You will hear a call waiting alert tone when there is a second incoming call. If you subscribe to both caller ID and call waiting with caller ID services, the second caller's information is displayed after you hear the call waiting alert tone.
1. Press [R]: answer the second incoming call.
2. Press [R]: to switch between calls.

Pause (for PBX / long distance service users)

A pause is sometimes required when making calls using a PBX or long distance service.
When storing a calling card access number and/or PIN in the phonebook, a pause is also needed.
EXAMPLE: If you need to dial the line access number "9" when making outside calls with PBX.
1. Press [9], then long press [#] on handset or [✱+] on telephone base.
2. Dial the phone number and press [✆] on handset or [✆] on telephone base.

NOTE: A 3-second pause is inserted each time and a character P is displayed.
Voice mail service.
The ⚮ icon flashes on the screen when you have received a new voice mail message from your service provider.
IMPORTANT: In order to use the voice mail service, you must subscribe to it from your telephone service provider.

7 Redial List

To make a call using the redial list

Cordless handset
The last 5 telephone numbers previously dialed are stored in the redial list.
To make a call using a phone number in the redial list:
1. Press [▲].
2. Press [▲/1 ▼/9]: select the desired phone number and then press [✆] to dial.

Telephone base

1. Press [▲].
2. Press [▲/1 ▼/9]: select the desired phone number.
3. Lift the corded handset, or press [✆] to make the call.

Saving a phone number from the redial list to the phonebook

Cordless handset

1. Press [▲].
2. Press [▲/1 ▼/9]: select the desired phone number and then press [OK].
3. Press [▲/1 ▼/9]: to select **SAVE NUMBER** and then press [OK].
4. Enter the name by using the dial key pad and then press [OK].

Telephone base

1. Press [☐].
2. Press [▲/1 ▼/9]: select the desired phone number.
3. Press and hold [☐].
4. Press [OK]: you hear a beep sound confirming that the number has been saved to the first available memory location in the phonebook.

Deleting phone number(s) from the redial list

Cordless handset

1. Press [▲].
2. Press [▲/1 ▼/9]: select the desired phone number and then press [OK].
3. Press [▲/1 ▼/9]: to select **DELETE** and then press [OK] twice to delete the selected number.

-OR-

Press [▲/1 ▼/9]: to select **DELETE ALL** and then press [OK] twice to delete all the numbers.

Telephone base

1. Press [▲].
2. Press [▲/1 ▼/9]: select the desired phone number.
3. Press [☐/⌫]: to **delete** the selected phone number -> [- - -] appears on LCD screen.

-OR-

Press and hold [☐/⌫]: to **delete all** the phone numbers -> [- - - - - - -] appears on LCD screen.
4. Press [OK]: you hear a beep sound confirming that the number(s) has/have been deleted.

8 Phonebook

On the handset, the phonebook can store up to 50 entries. Each number can be up to 24 digits long and each name can be up to 12 characters long. The phonebook on each handset is independent of each other. Changes made to the phonebook on one handset does not apply to another handset.
On the telephone base, the phonebook can store up to 30 entries. Each number can be up to 24 digits long. You cannot store a name on the telephone base phonebook.

Adding a phonebook record

Cordless handset
You can add a phonebook record.
1. Press [MENU] to enter in the menu.
2. Press [▲/1 ▼/9]: to select **PHONEBOOK** and then press [OK].
3. Press [▲/1 ▼/9]: to select **NEW ENTRY** and then press [OK].

ENTER NAME: Enter the name (max. 12 characters) and then press [OK].
ENTER NUMBER: Enter the number (max. 24 digits) and then press [OK].
If you need a pause between digits, press and hold the # until a **P** appears in the display. This will insert a 3-second pause in the dialing sequence.
Note: Press ⮌ to correct an error.

Telephone base
A phonebook record on the telephone base consists only of the phone number, not the name.
1. Press and hold [☐].
2. Enter the phone number.

3. Press [OK]: you hear a beep confirming that the number has been saved to the first available memory location in the phonebook.

Viewing a phonebook record

Cordless handset

You can use the menu to access the list of phonebook records.

1. Press [MENU] to enter in the menu.
2. Press [▲]/[▼]: to select **PHONEBOOK** and then press [OK].
3. Press [▲]/[▼]: to select **LIST** and then press [OK].
4. Press [▲]/[▼]: view the **name** of the desired record and then press [OK]: view the **number** of the desired record.
5. Press [✆]: to dial the number.
   -OR-
   Press [⏻]: to return to idle mode.

Telephone base

1. Press [📖].
2. On the scroll wheel, press [▲]/[▼]: select the desired phone record.
3. Press [⮌]: go back to idle mode.

Viewing a phonebook record using scroll wheel

Cordless handset

You can also use the scroll view to view the list of phonebook records directly. This is a shortcut method to access the phonebook.

1. Press [▼].
2. Press[▲]/[▼]: view the **name** of the desired record and then press [OK]: view the **number** of the desired record.
3. Press [✆]: to dial the number.
   -OR-
   Press [⏻]: to return to idle mode.

Editing a phonebook record

Cordless handset

You can edit the name and/or the number of a phonebook record.

1. Press [MENU] to enter in the menu.
2. Press [▲]/[▼]: to select **PHONEBOOK** and then press [OK].
3. Press [▲]/[▼]: to select **EDIT ENTRY** and then press [OK].

Cordless Handset

4. The LCD displays "**CONFERENCE**" on the cordless handset.

NOTES:

1. Press [INT/🔔] at telephone base to toggle between 2 calls.
2. Press [⏻] to terminate the intercom call on a cordless handset. The call will continue on the other handset(s).

Transferring calls

Cordless Handset

1. During an outside call: Press [INT].
2. Select the handset you want to page by pressing the desired handset number **[1]** to **[4]**, or you can page all handsets and the base by pressing [*]. Press [0] to page the telephone base.
3. Press [🎙] on the paged handset.
4. Press [INT] on the handset initiating the transfer.

Conference call

Cordless Handset

1. During an outside call: Press [INT].
2. Select the handset you want to page by pressing the desired handset number [1] to [4], or you can page all handsets and the base by pressing [*]. Press [0] to page the telephone base.
3. Press [🎙] on the paged handset and then long press [INT] on the initiating handset.
4. LCD on both handsets shows "CONFERENCE".

11 Called ID

Caller ID (CID) is a call log that shows the phone numbers of the incoming calls.

The system can store up to 20 Caller ID records on the telephone base and 10 Caller ID records in the cordless handset. Each record has a maximum length of 24 digits.

Telephone Base

Caller ID record displays the time, date and telephone number of the incoming call. The CID name is not displayed. In case the CID number cannot be displayed (such as a private number), only the time and date are displayed.

IMPORTANT: In order to use this unit's Caller ID features, you must subscribe to either the standard Name/Number Caller ID Service or Call Waiting Caller ID Service. To know who is calling while you are on the phone, you must subscribe to Call Waiting Caller ID Service.

Receiving CID records

Caller ID records are stored in the order they are received.

Storing CID records in CID memory

If you are not at home or cannot answer, your telephone's Caller ID memory stores the most recent calls. When it reach the maximum size, the oldest Caller ID record (1st call) is automatically deleted.

Receiving CID records and call back

Cordless Handset

As calls are received and stored, the display is updated to let you know how many calls have been received. To scroll CID records:

1. Press [▲].
2. Press [▲]/[▼]: select the desired record and then press [OK].
3. If the desired record is a name, press [OK] to show the number. For long numbers, press [OK] to show additional digits.
   To call back, press [✆].
   To exit, press [⏻] in idle mode.

Telephone Base

1. Press [▲].
2. Press [▲]/[▼]: select the desired Caller ID record.
3. Lift the corded handset, or [🔔] for handsfree talking.
   To exit, press [⮌] in idle mode.

Editing a phone number in the call log

Cordless Handset

1. Press [▲].
2. Press [▲]/[▼]: select the desired record and then press [MENU].
3. Press [▲]/[▼]: to select **EDIT ENTRY** and then press [OK].
4. Enter the number if necessary.
5. Press [▲]: save the new number in the record.
   - OR -
   Press [✆]: to dial out the number.

Deleting a CID record

Cordless Handset

1. Press [▲].
2. Press [▲]/[▼]: select the desired record and then press [MENU].
3. Press [▲]/[▼]: to select **DELETE** or **DELETE ALL** and then press [OK].
4. You hear a beep sound confirming that the Caller ID record(s) has/have been deleted.

Telephone Base

1. Press [▲].
2. Press [▲]/[▼]: select the desired Caller ID record.
3. [🗑/⌫]: delete the selected Caller ID record and then press [OK] to confirm.
   -OR-
   Press and hold [🗑/⌫]: delete all the Caller ID records and then press [OK] to confirm.

NOTES: If you wish to cancel the delete or delete all operations, press [⮌].

Storing a CID record

Cordless Handset

1. Press [▲].
2. Press [▲]/[▼]: select the desired record and then press [MENU].
3. Press [▲]/[▼]: to select **SAVE NUMBER** and then press [OK].

Saving CID record to phonebook

Telephone base

1. Press [▲]: view CID memory to be saved.
2. Press and hold [📖]. The CID number is displayed and can be edited.
3. Key in the number to add digits, or press [⮌] to delete.
4. Press [OK]: a confirmation tone is emitted and the telephone base returns to idle mode.

NOTE: Press [⮌] to cancel if you do not want to save the CID number. The telephone base returns to idle mode.

12 Technical details

Free field range	Up to 300 meters*
Indoor range	Up to 50 meters*
Handset battery life (average values)	7 hours talktime** 100 hours standby**
Number of handsets	Up to 4
Intercom mode	Yes
Three -way conference (1 outside correspondent + 2 internal correspondents)	Yes
Electrical connection / Base mains adapter / Charger	Base: S003IV0600050 S003IB0600050 Charger: S003IV0600015 S003IB0600015 Input: 100-240 V / 50-60 Hz Output: 6V DC / 500mA (BASE) 6V DC / 150mA (charger) Only use the adapters supplied with the telephone. Single-phase AC, excluding IT installations defined by the EN 60950 standard. Caution: the network voltage is classified as a hazard by the criteria of this standard.
Telephone connection	Appliance designed for connection to a TNV3 class (telecommunications network voltage) analogue telephone line as defined by the EN 60950 standard.
Batteries	High Power / Sanik – AAA – 1,2 V – 400 mAh Only use the batteries supplied with the telephone. Using any other type of battery presents a risk of explosion. Used batteries must be disposed of in compliance with current environmental protection regulations.
Operating temperature	From 5 to 40° C

* Value may vary according to environment.
** Depending on initial battery charge.

13 Troubleshooting guide

Problem	Cause	Solution
Nothing appears on the display	The device is not powered up. The batteries are flat.	Check the power supply connection. Put the handset back on its base to recharge the batteries.
There is no dial tone.	The handset is not registered on the base. The batteries are flat. The device is not connected to the telephone network. The device is not connected to the telephone network. The handset is out of range of the base. The line cord is incompatible.	See Section 5 "Registering handsets". Put the handset back on its base to recharge the batteries. Check that the phone cord is properly connected. Move nearer to the base. Use the cord supplied with the telephone.
The reception quality is poor, or deteriorates during a call.	You are out of range of the base or in an environment subject to interference. You have ADSL.	Move nearer to the base, or move the base 1 m. Connect an approved ADSL filter between the phone connector and the wall socket.
Your correspondent can't hear you.	The microphone is off: the Secrecy/ Mute function is active.	See Section 6 "Secrecy / Mute (microphone off)" of the user's guide.
The handset doesn't ring.	The handset ringer is off.	See Section 4 & 5 "Ringer volume".
The batteries are still flat after several hours on charge.	The base or charger is not powered up. The handset batteries are defective.	Check your power supply connections. Contact our Technical service if the telephone is under warranty, or ask your reseller to supply you with new batteries.

As a general rule, if a problem occurs, remove the batteries from all the handsets in your installation for about 1 minute, then disconnect and reconnect the power supply to the base and reinstall the handset batteries.
The store where you bought your telephone can also provide you with information and after-sales support.

14 SAFETY

In the event of an electrical hazard, the mains adapter acts as 230V power isolating device. It should therefore, as a precaution, be installed close to the appliance and be easily accessible. To disconnect the device from the primary power source, the mains adapter must be removed from the 230V AC/50 Hz socket.
If the mains adapter fails, it must be replaced by an identical model.
If not connected to the mains power or if there is a mains power failure, telephones that use cordless handsets will not work.
You will then be unable to make or receive calls in the event of an emergency.
This is why we recommend that you also keep a conventional telephone – one that doesn't require a power supply – as a backup.
! Do not use your telephone to notify a gas leak when standing in the vicinity of the leak.
It is recommended that you avoid using this device during electrical storms.
Do not attempt to open the batteries, as they contain chemical substances. In the event of leakage, avoid contact with the skin, eyes, nose and mouth. In the event of contact, rinse the affected part for about twenty minutes with running water and seek urgent medical attention. Clean the product with absorbent paper or a dry cloth and contact your reseller for replacement batteries.
ATLINKS hereby declares that the following models conform to the essential requirements and other applicable provisions of European directive 1999/5/EC.
Versatia E100 Combo / Versatia E100 Combo Duo / Trio
Versatia E150 Combo / Versatia E150 Combo Duo / Trio

15 CONFORMITY

This unit conforms to the following rules and regulations: 1995/5/EC Radio frequency and telecommunication equipment and the mutual acceptance of conformity.
The CE mark proves the above.

CE

16 ENVIRONMENT

This symbol means that your inoperative electronic appliance must be collected separately and not mixed with the household waste.The European Union has implemented a specific collection and recycling system for which producers are responsible.
This appliance has been designed and manufactured with high quality materials and components that can be recycled and reused. Electrical and electronic appliances are liable to contain parts that are necessary in order for the system to work properly but which can become a health and environmental hazard if they are not handled or disposed of in the proper way. Consequently, please do not throw out your inoperative appliance with the household waste.
If you are the owner of the appliance, you must deposit it at the appropriate local collection point or leave it with the vendor when buying a new appliance.
- If you are a professional user, please follow your supplier's instructions.
- If the appliance is rented to you or left in your care, please contact your service provider.
Keen to preserve the environment, ATLINKS has equipped this appliance with a switching power supply, offering better energy efficiency. The advantages include not only very low electricity consumption, but also a more compact format than the conventional power supply units used by the previous range.
The used batteries from your telephone (if it has batteries) must be disposed of in compliance with current environmental protection regulations. Comply with your local regulations.
Return your batteries to your reseller or dispose of them at an approved recycling centre.
Help us protect the environment in which we live!
